

## Overview

# Digital Transformation Practice

## Pega Digital Process Transformation Practice

The Digital Process Transformation Practice from NIIT Technologies is powered by its two specialist subsidiaries – Incessant & RuleTek – who bring unmatched expertise in assisting global organizations to achieve their digital process automation goals and revolutionize their customer's experience.

The combined strength of Incessant and RuleTek powers the Pega Practice with unmatched certification levels in the industry, with highly experienced teams offering consulting and implementation services to help deliver mission critical customer engagements. With experience of over 300+ successful customer implementations and a suite of Pega Platform productivity solutions, we deliver significant value to customers in Insurance, Banking & Financial Services, Government, Manufacturing and Travel.

# About Us

## Unmatched Expertise

### Key Pega Certifications

Certified Lead System Architect

Certified Pega Decisioning Consultant

Certified Customer Service Architect

## Pega Solutions and Accelerators

### iVLSA - Pega AI based Virtual LSA

Designed to perform a thorough review of Pega applications remotely, providing real-time suggestions to developers during the implementation cycle – enhancing code quality and developer efficiency

### RAPID – Optimize the prioritization and despatch of work orders

RAPID is a single point solution uniquely designed to optimize the prioritization and dispatch of work orders. By leveraging Pega's Field Service Management system the solution provides automatic creation and real time analysis of work orders.

### Integrated DevOps Suite

Enabling continuous delivery with solutions and processes that move applications quickly from development, through to testing and then rapid deployment

### Pega & Blockchain Solutions

Integrate with Blockchain to support your KYC process and e-Checks

### Seamlessly Manage Cases and Content

Integrated Pega Case and Content / Document Management Platform using Alfresco

### Contract Management Framework

Contract Management framework allowing users to intelligently assemble, publish, and orchestrate the lifecycle of use-case specific documents with ease

## Service Offerings

### Pega Platform

- » Pega Architecture Consulting
- » Pega COE Enablement
- » Pega Platform Implementation
- » Pega Upgrades

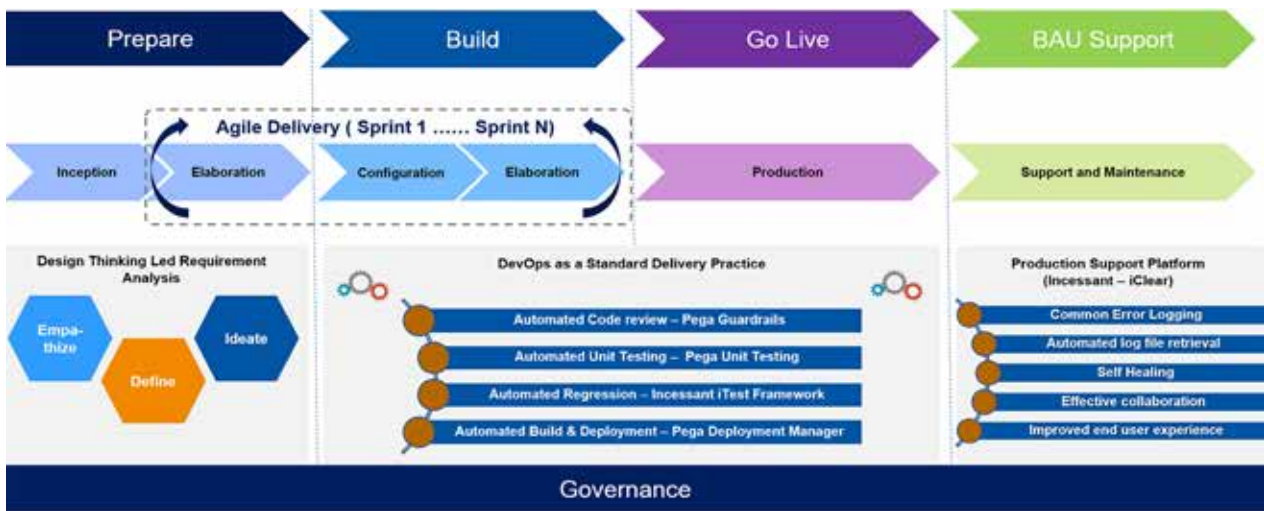

### Customer Service & Marketing

- » Decisioning / Next Best Action
- » Multi-Channel Enablement
- » Pega UEX & Customer Journeys
- » Robotic Process Automation

### Support & Automation

- » Pega / DevOps Acceleration
- » QA Automation
